

SmartPay and Security Agenda

09:30 – Registration

Arrival, sign-in, teas & coffees.

10.00 – Introduction – Caroline Woods, National Sales Manager, Adelante Software

10:05 – Jeremy King, International Director, PCI Security Standards Council

An update from Jeremy on future developments from the PCI Security Council and the impacts these have on councils & business in general.

10:30 – Darrell Bluck, Business Development Director, Adelante Software

Darrell will provide an update on some of the new developments that allow councils to automate card payments and make them more secure.

10.50 – Martin Smith, Pen Test Partners – PCIDSS QSA

Martin will talk about how to reduce the scope of your payment channels for PCIDSS compliance, and how to avoid SAQ-D with services like SmartPay and significantly reduce your compliance burden.

11:10 to 11.30 – Tea & coffee break

11.30 – Emma Harley, Finance Manager, Tewkesbury Borough Council

Tewkesbury have recently gone live with SmartPay. Emma will explain the reasons they chose to work with Adelante, the purchasing route they chose, how the product implementation process went and what benefits they have seen after moving over to SmartPay.

11:50 – Martin Morris, Director, GCI

How Council staff can take call centre payments from customers without being exposed to card data, removing 98% of applicable PCI DSS obligations. In this session we will see simulated payments where staff can oversee the payment but never the card data.

12:10 – Andy Flavell, Framework Director, CPRAS

CPRAS run a framework for the provision of merchant services. If your authority has not reviewed their merchant account charges for the last 2 years, there is a very good chance that savings can be achieved. Average savings with Councils to date have been in excess of 30% and CPRAS will produce a comparison report for each Council, without cost or obligation.

12.30 – Lunch

A buffet lunch will be served, with time for networking and questions.

14:00 – Event Ends
