It's all about your website!

The key to any successful e-commerce business is a website that attracts new visitors, optimises conversion rates and provides an efficient payment facility that helps encourage customers to keep coming back for more.

The Adelante e-commerce Gateway is a perfect solution for any business, large or small, looking to accept card payments online.

Choose the right package for you:

OPTION ONE

Option 1 – £10 per month minimum charge and 15p per transaction

OPTION TWO

Option 2 – £30 per month minimum charge and 10p per transaction

OPTION THREE

Option 3 – £100 per month minimum charge and 8p per transaction

The minimum charge relates to the transaction charge. If all of your transaction charges don't add up to the minimum then that is what we invoice. Therefore the first 66 transactions on the £10 rate and the first 300 on the £30 rate are included in the minimum charge. There is no fixed term contract for ConnectPay. You can cancel the account with just 30 days' notice.

To accept online payments you will need an e-commerce merchant account. This is an account that processes and collects all card payments and passes the funds automatically into your business bank account. We can assist you in opening an account if you have not previously traded online. Alternatively you can use your existing provider if you have one.

For more information, or to get started please call us now on 01628 820600 or email sales@adelante.co.uk
